KLARAVIK

Pons project assets package includes:

- One (1) prototype-vehicle of “Sango RC1”. (NOTE: not road-legal. The vehicle has been driven, but is currently inoperable.)

- One (1) “skateboard” vehicle. (A platform with chassis of PONS “Sango RC1”. Same note and caution apply as above)

- Full IP rights to the PONS platform and Sango vehicle-technology (with exception of the systems and components that are supplier IP, amongst those: the hub-motors)

- Full rights to the body-shape of the Sango. (NO protection is registered at PRV or EUIPO offices)

- Two (2) hard-drives with all the available technical documentation of Sango RC1 and RC2 (planned successor of RC1), amongst the over 100000 files are 3D CAD files, market analytics and files related to concepts of mobile app and fleet-management system. CAD files are in Siemens Teamcenter NX format.

- Most tools for exterior body-panel and interior panel laminating (glass-fiber or carbon-fiber)

- Limited amount of assembly-parts (could be used as spare parts, but insufficient stock for one complete vehicle).

NOTE: None of the vehicles in this auction are type-approved, and none can be registered for road use. All vehicles are therefore sold as museum items.
