

INFINICUT[®]

22" & 26" Pedestrian Cylinder Mower

**FOR: BOWLS, CRICKET, TENNIS,
GOLF GREENS**

FIXED (FX) or FLOATING HEAD (FL) DESIGN

LEADING-EDGE CUT QUALITY

INTERCHANGEABLE CASSETTES

COOL AND WARM SEASON GRASS COMPATIBLE

OPTIONAL OUT-FRONT BRUSH & WEIGHT KIT AVAILABLE

LITHIUM BATTERY POWER

PERFECT BALANCE

LIGHTWEIGHT

Wimbledon

"These are some of the most prestigious tennis courts in the world, so we want the best equipment to help us maintain championship performance. We've seen an improvement in the quality of the playing surfaces since we began using the INFINICUT[®] cylinder mower."

Neil Stubbley - Head of Courts and Horticulture

Photograph shows 26" Fixed Head version

FL22 & FL26 - Dynamic Return Floating Head

The use of a mower with a cutting unit independent of the traction unit (normally termed floating head) will decrease ground pressure as the combined weight of the mower is spread between both elements – traction unit and cutting unit.

ERGONOMIC DESIGN

The ergonomic, easily adjustable, handle allows for configuration to a comfortable operating position with all controls simple to operate.

VARIABLE CLIP RATE

The adjustable variable clip rate and forward speed adjustment system* results in a no compromise solution for sports turf maintenance.

BALANCED IN OPERATION

The weight transfer to the cassette is limited because the collection bucket is mounted on the traction unit frame. The result makes the unit optimally balanced during operation and end-of-line turning, giving a more consistent height in use.

POWER

Power is delivered by a lithium power source. Available in either 1.4kWh or 2.8kWh to drive the traction unit and the reel's DC brushless motor. They can be quickly swapped, in-field if necessary, to suit the working environment.

Engine option: Available as an option on FX (Fixed Head) versions.

ADJUSTABLE CHASSIS

From the on-the-fly wrenchless adjustment of the front roller height to the adjustable bedknife, the user can make further adjustments to maximize cutting efficiency no matter what the conditions.

Wrenchless Height Adjuster

Wrenchless Height Adjuster has become the industry benchmark for this type of application.

Low Ground Pressure

The ground pressure of the unit is evened out over the rear roller and the two chassis rollers due to the floating head design.

Adjustable Bedknife

Alteration of the bedknife geometry/attitude can compensate for bedknife face wear and offers consistency in the level of plant stress.

DETACHABLE WHEELS

The detachable wheels aid transportation over concrete approaches.

QUALITY REEL

In-house designed and manufactured cutting reels available in 7, 11 and 14 blade set up. Optional single lever engage groomer attachment available to give a cutting height range of 1.8mm to 25mm (0.07in to 1in). The optional Groomer attachment contra rotates to achieve the maximum effect in alleviating grain and turf density problems. It has a fully sealed gearbox and is designed for single lever action to give simple engagement or disengagement and can be installed and removed in rapid fashion.

FRONT ROLLER

Can either be specified as smooth, grooved or Wyle.

* Patents granted or pending.
